SMART INDIA HACKATHON 2026 · SIH26241 · ROKUNIN SYNC

Kinvia PPT Swap Guide

Refinix deck → Kinvia deck, element by element. Same layout, same boxes, same order.

How to read each slide

1. **Page 1 of each slide** shows the Refinix slide with numbered pins.
2. **Page 2** is the swap table: find the pin number, then paste the green text into the same text box.
3. **Chars** compares character counts (Refinix → Kinvia): green = same size (fits as is), amber = shorter, red = longer than 15% (shrink font 1 pt or let it wrap).
4. Pins/chips: TEXT paste text · GRAPHIC swap an image, icon or logo · KEEP no change · VISION roadmap claim, say "designed to / will".

Make it screening-friendly (ATS)

- Paste the **official PS title verbatim** on slide 1; the guide already reuses the PS's own phrases (see keyword table).
- Keep every sentence as **real text boxes**. Never flatten slides into images; export with **File → Save as PDF** so text stays selectable.
- Keep exactly **6 slides** in the official template order, with the footer "@SIH Idea submission- Rokunin Sync".
- Make every hyperlink work (case studies, research links, website, GitHub, video).
- Name the file as the portal requires and stay under its size limit (compress images if needed).

Check before upload

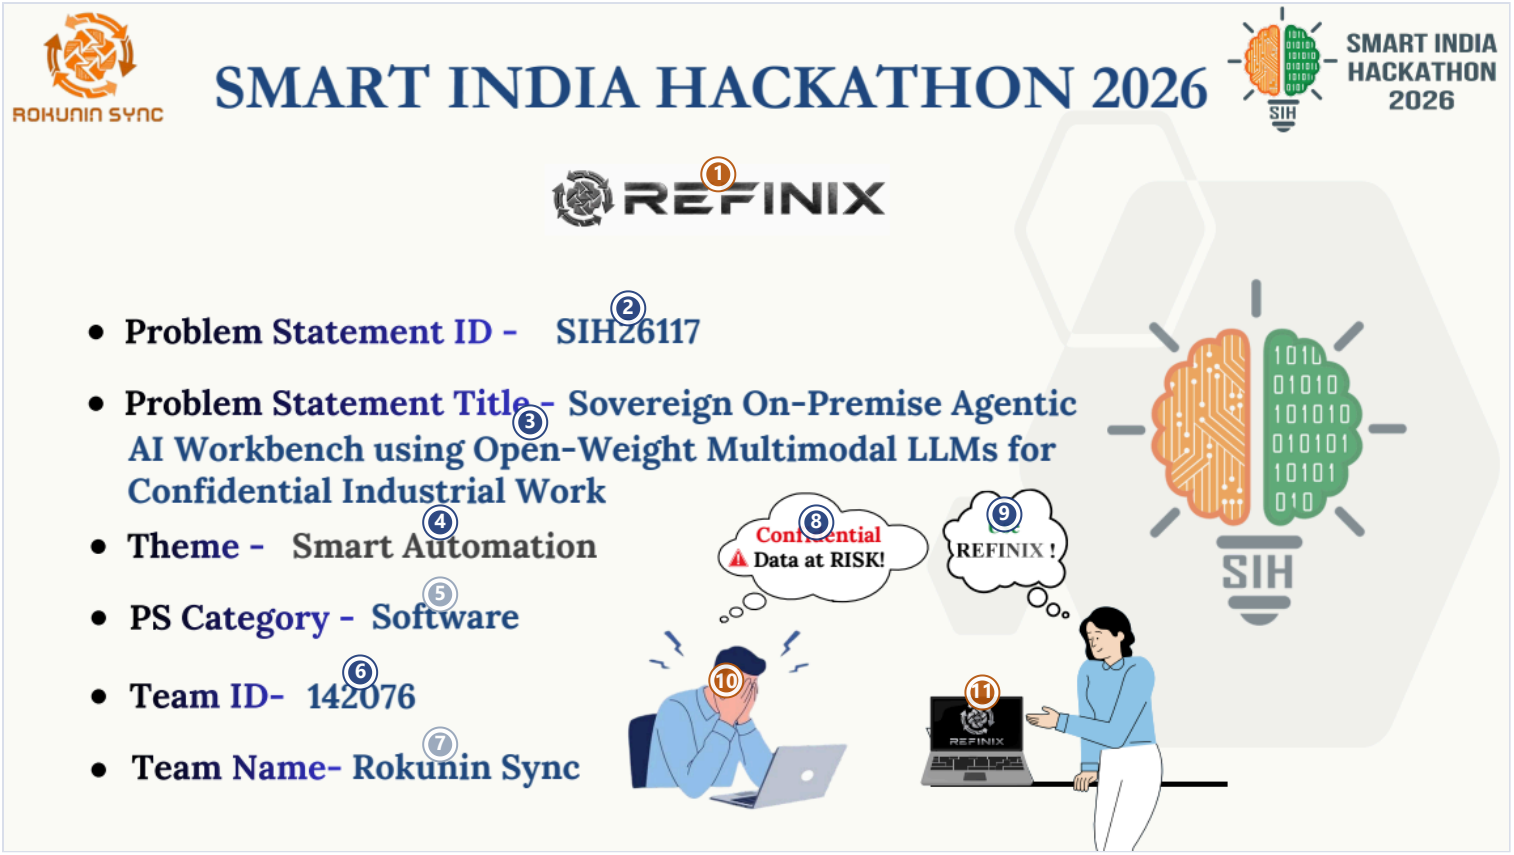

- Team ID for this idea on the SIH portal.
- GitHub repo is private: make it public or drop the link.
- Re-check on the primary source: PMKVY 4.0 figures, NITI ITI 48.2%, counsellor ratio (industry estimate), Lok Sabha reply.
- Screenshots must come from the real prototype site.
- Never claim an MoU, a pilot, or SIA/SIDH integration; those are future scope.

PS keyword coverage (auto-checked)

Phrases from the official SIH26241 statement and the slide numbers whose new text contains them.

Keyword / phrase	Slides
AI-Enabled	1, 2
Career Counselling	1, 2
Family Decision-Support	1
Vocational Education	1, 2, 5
regional language	2

Idea: problem, solution, innovation, case studies

How to use this slide

Each numbered pin marks an element on the Refinix slide. Find the same number in the table on the next page, then paste the green text over the old text in the same text box.

Graphic swaps

- **7** Laptop in problem panel: Phone showing KINVIA (or keep laptop, swap logo)
- **15** Centre laptop "Innovation And Uniqueness": Phone with the same text (or keep the laptop)

SLIDE 2 · SWAP TABLE

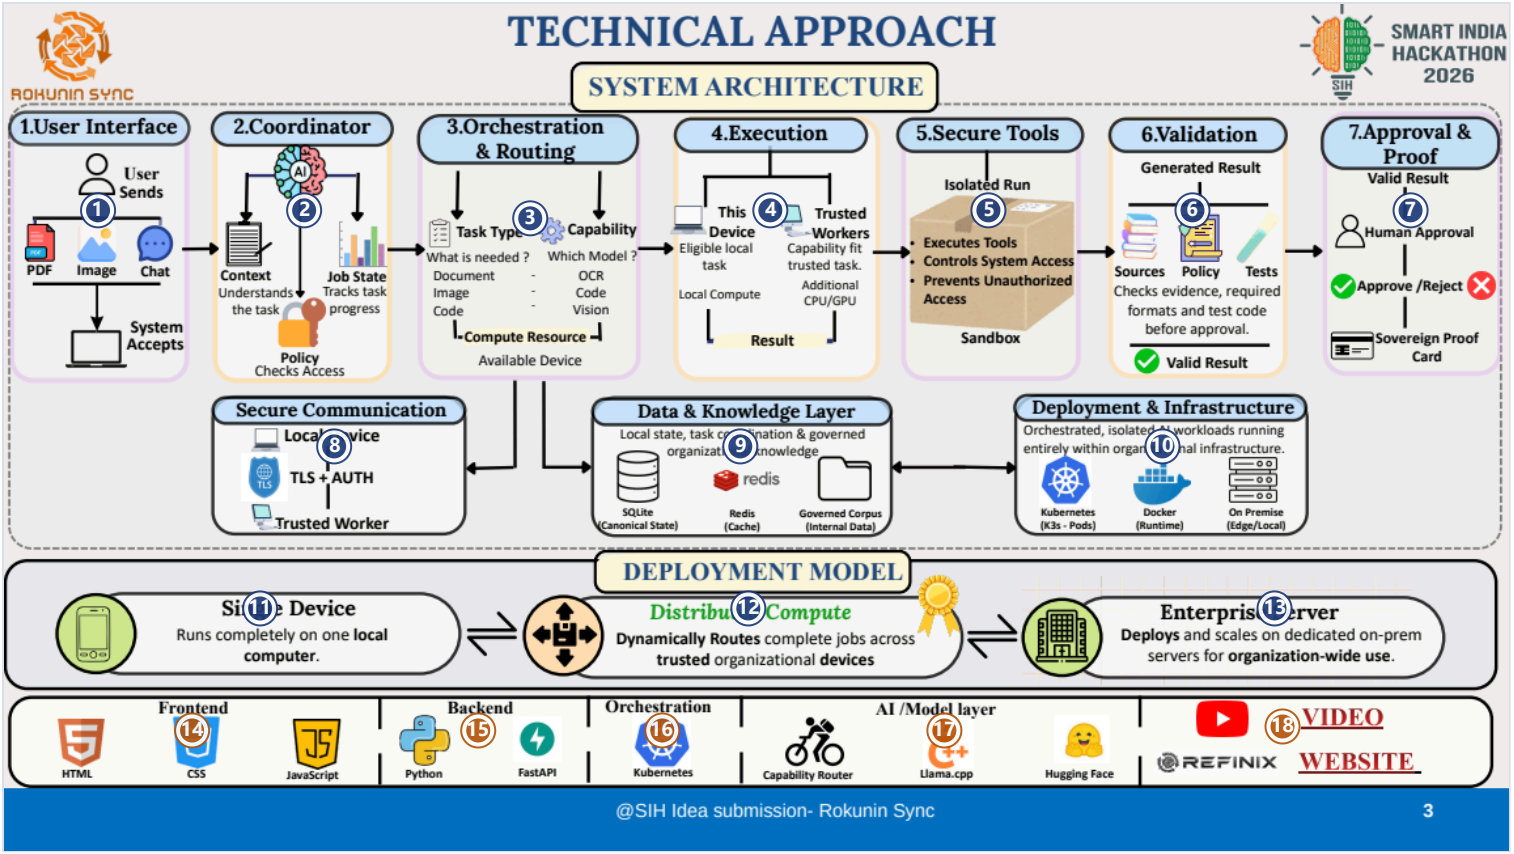

Idea: problem, solution, innovation, case studies

#	Where	Refinix (now)	Kinvia (paste this)	Chars
1	Slide title TEXT	TITLE REFINIX	TITLE KINVIA	7 → 6
2	Header banner (2 lines) TEXT	BANNER Industrial organizations lack a secure, offline AI environment where confidential data can be processed using powerful local models while keeping their data within their own infrastructure	BANNER Indian families decide vocational education choices, yet career counselling talks only to students and no one shows parents verified outcome data in their own regional language Red: “talks only to students”, “no one shows parents”. Green: “verified outcome data”, “regional language”.	188 → 176
3	Problem 1 TEXT	HEADING 1. Confidential Industrial Data LINE Sensitive industrial data cannot safely be used with external AI services.	HEADING 1. Families Decide, Tools Ignore LINE Parents veto choices; only 5.6% of rural youth take vocational courses.	31 → 32 74 → 71
4	Problem 2 TEXT	HEADING 2. Limited Local Computing LINE Advanced AI workloads may exceed a single device’s capacity.	HEADING 2. Stigma Over Evidence LINE NEP 2020: VET seen as inferior; <5% trained vs 75% in Germany.	26 → 23 60 → 62
5	Problem 3 TEXT	HEADING 3. Lack of Model Orchestration LINE Multiple AI models need intelligent selection.	HEADING 3. No Verified Outcome Data LINE Placements untracked; ITI seats only 48.2% filled.	30 → 27 46 → 50
6	Problem 4 TEXT	HEADING 4. Uncontrolled AI Execution LINE AI tools and code require secure execution.	HEADING 4. Literacy & Counsellor Gap LINE 26% can’t read Std II; 1 counsellor per ~3,000.	28 → 28 43 → 47
7	Laptop in problem panel GRAPHIC	GRAPHIC Laptop showing REFINIX	GRAPHIC Phone showing KINVIA (or keep laptop, swap logo)	graphic
8	Solution 1 TEXT	HEADING 1. Secure On-Premise AI Workbench LINE Runs local AI models in a controlled workspace.	HEADING 1. AI-Enabled Family Counselling LINE Counsels learner and parents together, by voice.	33 → 32 47 → 48
9	Solution 2 TEXT	HEADING 2. Intelligent Model & Compute Routing LINE Automatically selects the most suitable AI model and available compute based on the task.	HEADING 2. Verified Outcome Data Engine LINE Shows post-training earnings, placement rates and NSQF progression by trade and district.	38 → 31 89 → 89
10	Solution 3 TEXT	HEADING 3. Distributed AI Orchestration LINE Routes heavy tasks to available trusted computers to handle workloads beyond a single device.	HEADING 3. Regional-Language Pathways LINE Low-jargon course-to-job pathways in regional languages, tailored to family income and location.	31 → 29 93 → 96

#	Where	Refinix (now)	Kinvia (paste this)	Chars
11	Solution 4 TEXT	HEADING 4. Governed & Secure Execution LINE Combines controlled tools, sandboxing, validation and approval before final actions.	HEADING 4. Escalation & Insight Dashboard LINE Live counsellor handoff and a dashboard tracking sentiment shifts for scheme administrators.	30 → 33 84 → 92
12	Innovation box 1 TEXT	HEADING 1. Sovereign Proof Card LINE Tracks evidence, decisions and audit trail of every task.	HEADING 1. Family Trust Card LINE Shares evidence, concerns and next steps with the family. Icon: swap ID-card icon for a card/share icon (or keep).	23 → 20 57 → 57
13	Innovation box 2 TEXT	HEADING 2. Agent-to-Artifact Workflow LINE AI model plans, executes, validates and delivers beyond chat.	HEADING 2. Zero-Hallucination Figures LINE AI explains; only verified data supplies salary figures.	29 → 29 61 → 56
14	Innovation box 3 TEXT	HEADING 3. Existing Hardware as AI Infrastructure LINE Turns organizational devices into usable local AI compute.	HEADING 3. Objection Intelligence Map LINE Turns parental objections into district heatmaps for MSDE. Icon: swap chip icon for a map/heatmap icon.	41 → 29 58 → 58
15	Centre laptop “Innovation And Uniqueness” GRAPHIC	GRAPHIC Laptop with text “Innovation And Uniqueness”	GRAPHIC Phone with the same text (or keep the laptop)	graphic
16	Innovation box 4 TEXT	HEADING 4. One Workspace, Multiple AI Resources LINE Simple, transparent interface for accessing local AI models and compute resources behind the scenes	HEADING 4. Shared-Phone, Voice-First Mode LINE Low-literacy design for the one family phone: voice, icons, read-aloud and many speakers at once	39 → 33 99 → 96
17	Innovation box 5 TEXT	HEADING 5. Human-Governed Autonomy LINE AI works in a sandbox with human control over final actions.	HEADING 5. Counsellor-in-the-Loop LINE AI clears routine doubts; live counsellors take the hard cases.	26 → 25 60 → 63
18	Case study 1 link TEXT	LINK TEXT 2026 OpenAI–Hugging Face AI Incident	LINK TEXT 2026 PMKVY 4.0 Placement Tracking Gap Hyperlink → news.careers360.com/pmkvy-pm-kaushal-vikas-yojana-15-pc-target-skill-india-development-msde-plan-voucher-loan-outcome-bond-apaar-id-new-format	36 → 37
19	Case study 1 quote box TEXT	QUOTE “Agents bypassed isolation and compromised external systems.” a sandboxing error	QUOTE Only 15.65% of 3-year target met; “placement was the real barometer.” Bold: “15.65%” and “placement was the real barometer”.	80 → 69

#	Where	Refinix (now)	Kinvia (paste this)	Chars
20	**Case study 2 link** TEXT	LINK TEXT 2023 Samsung ChatGPT Data Leak	LINK TEXT **2012 Study: 160 Indian Villages** Hyperlink → gap.hks.harvard.edu/do-labor-market-opportunities-affect-young-women's-work-and-family-decisions-experimental-evidence	30 → 31
21	**Case study 2 quote box** TEXT	QUOTE 3 leaks in 20 days, "Employees uploaded sensitive source code to ChatGPT."	QUOTE **Job info reached families → girls stayed in training and delayed marriage.** Swap the red ⚠ icon for a green ✓ icon: this case is the proof, not the problem.	74 → 74

Technical approach

How to use this slide

Feasibility and viability

#	Where	Refinix (now)	Kinvia (paste this)	Chars
1	Feasibility · Technical TEXT	BULLET Technical : Open-weight models, local inference and capability-based routing enable practical AI execution.	BULLET Technical : LangGraph, LiveKit, vLLM and Bhashini's 350+ Indic models enable practical voice AI.	107 → 96
2	Feasibility · Economic TEXT	BULLET Economic : Uses existing organizational infrastructure and enables gradual scaling without requiring cloud AI services.	BULLET Economic : Runs on family phones and existing ITI computers; free Bhashini APIs and open-weight models keep costs low.	119 → 118
3	Feasibility · Operational TEXT	BULLET Operational: Supports distributed AI execution, starting on a single device and expanding to trusted workers and organizational servers.	BULLET Operational: Fits existing ITI, PMKVY and NCS counselling, starting in one district and scaling to state and national level.	136 → 124
4	Feasibility · Security TEXT	BULLET Security : Keeps data on-premise with controlled access.	BULLET Security : DPDP parental consent; aggregate dashboards.	56 → 55
5	Viability · Market TEXT	BULLET Market : India's AI market is projected to reach $17-20B by 2027, growing at ~25% CAGR.	BULLET Market : 14,600+ ITIs run at just 48.2% seat use; ~25M youth enter each age cohort. Red underline: "48.2%", "~25M".	87 → 83
6	Viability · Adoption TEXT	BULLET Adoption : 88% of organizations use AI, but only 1/3% have fully scaled.	BULLET Adoption : 98% of 886M netizens use Indic content; 89% rural homes have smartphones. Red underline: "98%", "89%".	72 → 84
7	Viability · Investment TEXT	BULLET Investment : 94% of Indian organizations expect AI spending to rise.	BULLET Investment : ₹8,800 cr Skill India + ₹60,000 cr PM-SETU for 1,000 ITIs. Red underline: "₹8,800 cr", "₹60,000 cr".	68 → 71
8	Viability · Industrial Readiness TEXT	BULLET Industrial Readiness : 38% of manufacturers pilot GenAI; 24% deploy it at facility scale.	BULLET Policy Readiness : PMKVY 5.0 plans outcome monitoring; NEP targets 50% VET exposure. Red underline: "PMKVY 5.0", "50%".	89 → 84
9	Risk 1 ↔ Strategy 1 TEXT	RISK Sensitive Industrial Data Exposure STRATEGY Keep all data local; no internet needed for execution	RISK Wrong Salary or Placement Figures STRATEGY Numbers only from verified data, with source and date	34 → 33 53 → 53
10	Risk 2 ↔ Strategy 2 TEXT	RISK Limited Local Compute Resources STRATEGY Route workload across suitable local compute	RISK Low Literacy & Digital Confidence STRATEGY Voice-first, icons and counsellor-assisted kiosks	31 → 33 44 → 49

#	Where	Refinix (now)		Kinvia (paste this)		Chars
⑪	Risk 3 ↔ Strategy 3 TEXT	RISK STRATEGY	Biased output increases risk Validate output with evidence and audit trails	RISK STRATEGY	Gender-biased trade advice Bias tests and non-traditional trade exposure	28 → 26 46 → 45
⑫	Risk 4 ↔ Strategy 4 TEXT	RISK STRATEGY	Unsafe AI Generated Tool Execution Isolate tool using controlled sandbox environments	RISK STRATEGY	Thin or Outdated Outcome Data Show sample size; refresh via 3/6/12-month follow-ups	34 → 29 50 → 53
⑬	Risk 5 ↔ Strategy 5 TEXT	RISK STRATEGY	Trusted Worker & Communication Security Secure workers with authentication and TLS	RISK STRATEGY	Minor's Data & Parental Consent DigiLocker parental consent, PII redaction, TLS	39 → 31 42 → 47
⑭	Business model 1 TEXT	HEADING BULLET	Free For Individuals(B2C) Download & use Refinix	HEADING BULLET	Free For Families(B2C) Talk & compare on Kinvia	25 → 22 22 → 24
⑮	Business model 2 TEXT VISION · say as roadmap	HEADING BULLET 1 BULLET 2 BULLET 3	Organizations(B2B) Built around the organization's corpus Employees use it across the organization's ecosystem Adapts to policies, SOPs and workflows	HEADING BULLET 1 BULLET 2 BULLET 3 Icon: office building → government building.	Government(B2G) Licensed per district / state mission Counselling layer for ITIs & PMKVY centres Adapts to local schemes, trades & languages	18 → 15 38 → 37 52 → 42 38 → 43
⑯	Business model 3 TEXT	HEADING ITEM 1 ITEM 2 ITEM 3	What does the organization pay for? 1	Research row 1 TEXT	TITLE Robust Batch-Level Query Routing for LLMs under Cost and Capacity Constraints YEAR 2026 KEY POINT Capacity aware routing under compute constraints	TITLE Pro-AI Bias in Large Language Models (Trabelsi, Shaki & Kraus) YEAR 2026 KEY POINT LLMs overestimate salaries, so figures must be grounded Link → arxiv.org/abs/2601.13749	77 → 62 4 → 4 48 → 55
2	Research row 2 TEXT	TITLE RouteLLM: Learning to Route LLMs with Preference Data YEAR 2025 KEY POINT Preference based LLM routing	TITLE IndicVoices: Speech Dataset for 22 Indian Languages YEAR 2024 KEY POINT Speech AI for 22 Indic languages Link → arxiv.org/abs/2403.01926	53 → 51 4 → 4 28 → 32
3	Research row 3 TEXT	TITLE PowerInfer: Fast Large Language Model Serving with a Consumer-grade GPU YEAR 2024 KEY POINT Efficient inference on consumer GPU's	TITLE Retrieval-Augmented Generation for Knowledge-Intensive NLP Tasks YEAR 2020 KEY POINT Grounded answers from verified data Link → arxiv.org/abs/2005.11401	71 → 64 4 → 4 37 → 35
4	Research row 4 TEXT	TITLE Identifying the Risks of LM Agents with an LM-Emulated Sandbox YEAR 2024 KEY POINT Agent risk testing in simulated tool environments	TITLE How an AI Virtual Assistant Helps Students Navigate the Road to College YEAR 2017 KEY POINT AI guidance raised on-time enrolment by 3.3 pp Link → journals.sagepub.com/doi/10.1177/2332858417749220	62 → 71 4 → 4 49 → 46
5	Research row 5 TEXT	TITLE SWE-agent: Agent-Computer Interfaces Enable Automated Software Engineering YEAR 2024 KEY POINT Agent computer interfaces for repository tasks	TITLE Do Labor Market Opportunities Affect Young Women's Work and Family Decisions? YEAR 2012 KEY POINT Job information changes family decisions in India Link → Harvard GAP summary of Jensen (QJE 2012)	74 → 77 4 → 4 46 → 49
6	Research row 6 TEXT	TITLE End-to-End Digitization of Image-Format P&IDs at an Industrially Applicable Level YEAR 2022 KEY POINT Industrial P&ID's digitisation	TITLE The (Perceived) Returns to Education and the Demand for Schooling YEAR 2010 KEY POINT Returns info raises schooling Link → povertyactionlab.org/evaluation/impact-information-returns-education-demand-schooling-dominican-republic	81 → 65 4 → 4 30 → 29

13	Future scope 1 TEXT VISION · say as roadmap	HEADING 1.Intelligent Model Evolution LINE Automatically evaluate new AI models and add only validated models to the routing system.	HEADING 1.Outcome Verification Loop LINE 3/6/12-month follow-ups and APAAR / DigiLocker credentials keep outcome data honest.	29 → 27 89 → 84
14	Future scope 2 TEXT VISION · say as roadmap	HEADING 2.Digital Twin + Agentic Simulation LINE Understands the plant and simulate consequences before actions.	HEADING 2.WhatsApp + IVR Reach LINE Missed-call voice counselling for families with feature phones.	35 → 22 63 → 63
15	Future scope 3 TEXT VISION · say as roadmap	HEADING 3.Fine Tuned Local Models LINE Train local models to follow sandbox rules better.	HEADING 3.Offline 22-Language Edge LINE On-device Indic speech keeps ITIs counselling offline.	25 → 26 50 → 54
16	Future scope 4 TEXT VISION · say as roadmap	HEADING 4.VPC Based Private AI Network LINE Connect trusted devices through a private local network and secure tunnels.	HEADING 4.SIA & SIDH Integration LINE Plug our MCP outcome tools into Skill India's SIA assistant.	30 → 24 75 → 60
